N.S.I.P.E. GENERAL MEETING

March 19 2013

A small group of members had a guided tour of the green technology at the Waterfront Campus of NSCC. Students learn about solar panels both flat panel and evacuated tube type, warm air walls that pre heat air for MUA units, wind turbines and living walls. There are energy management software programs. Students also study lighting technologies and many other green technologies.

This year the executive has a student representative Kevin Gomes, below is a brief biography of Kevin

I'm 22, born and raised in Nova Scotia. I've always had an interest in anything mechanical, and always liked learning how things work. Power engineering as a trade allows me to learn more about machines, and apply these skills to the real world. I am in my second year of the Power Engineering Technology program at NSCC Akerley campus. The second year portion of the program is designed around the third class ticket, and the material is much more in-depth this year especially around topics like turbines and steam generating units. The program is very much hands on learning, and we have our own steam plant that we can use and practice with. Overall I am excited to see what the trade has to offer

**The 2013 Chief Power Engineers & Chief Operators of Nova Scotia
Conference & Trade Show
October 23 & 24
Holiday Inn, Wyse Rd, Dartmouth NS
More details will be posted on the website under the conference tab**

The IPE Maritimes now has a Google Group

Hi

Some members were asking how they can see the E-mails on the Internet.

First you need a Gmail account to access the Google Group area.

Sign into you Gmail account as you would normally and then go to the web page for this group (found at the bottom of this E-mail)

NOTE:

You can only access this group if you are a member of it so if your Gmail account is not on our list you still will not have access.

If you wish to access this group (with that new Gmail account) send me the email address and I will add it.

On the Internet you can view all previous Emails, reply to them, and add tags to them.

You can also change the way you receive Emails :

-One at a time (default)

-gathered together and sent one a day

You can also choose not to receive any E-mails (in case you wish to check them manually).

If you have any problems accessing the List Server or any other questions my own email is Jamie.Swindells@gmail.co
